7		0174733	3/8" STEEL FLAT WASHER	16
8		SEALANT - 60ml	Self Leveling Adhesive Sealant	1

Step 1 – Determine Distance Between Feet

- Measure the desired mounting locations on the covered service body.

- Determine the best mounting width. Locate the corresponding slots on the ladder rack bow. **Be sure to use the same slot at each end of the ladder rack bow.**

Step 2 – Mount Feet to Bow

- Using the correct slots that were determined in the previous step, place the foot on the underside of the bow in the orientation shown
- Attach using 3/8" x 7/8" hex head bolts, 3/8" split lock washers and 3/8" flat washers. **Be sure the foot is in the correct orientation so that the angle on the bottom of the foot fits the angle of the covered service body.**
- Repeat at all four locations.
- Snug tighten, but allow movement.

Step 3 – Install Rack

- Place ladder rack with feet on top of the covered service body.

- Be sure the rack is centered on top of the covered service body.

- Ensure the rear of the rack is far enough off the rear of the vehicle that when placing a ladder on the rack, the ladder does not hit the vehicle.

ENSURE THIS IS THE LOCATON THE RACK IS DESIRED.

- Mark through all four feet onto the top of the covered service body.
- **ENSURE SAFETY PRIOR TO DRILLING.**

- Remove the assembled rack with the feet and drill at all eight marked locations using a 11/32" drill. **Be sure area below marked location is safe to drill.**
- Replace the rack on top of the covered service body.
- Place sealant around the holes in the covered service body.
- The metal body goes in between two rubber pads.
- Bolt into place using 5/16" x 1-1/4" hex heads, 5/16" flat washers, and rubber pads **ON TOP OF ROOF**; and rubber pads, metal plates, 5/16" flat washers and 5/16" lock nuts **INSIDE ROOF**.
- Tighten.

GO BACK AND ENSURE ALL HARDWARE IS TIGHT.

INSTALLATION IS NOW COMPLETE.
