

How can strategic vehicle management drive your business growth?

You've built a successful company, and you know your business. Your focus needs to be on your business and your customers. Most small business owners are not fleet managers by trade, which can sometimes lead to struggles in managing your vehicles or knowing how to think of them like a fleet. That's where Holman comes in, to make your fleet more productive, predictable, and profitable while you drive your business forward.

Finding your vehicles.

Finding vehicles has never been easier. Work with Holman to choose a sourcing method that aligns with your timing and budget. There are several ways to source a vehicle depending on your needs. Holman can do the heavy lifting and find the vehicle for you, whether that's a pool unit with upfitting or a factory order.

Maintaining your vehicles.

Holman works to understand your specific challenges in controlling fuel costs, managing preventative maintenance and repair work, and keeping your vehicles inspected. Our network of more than 100,000 service stations nationwide ensures your vehicles receive the care they need; at a price you can trust. With proactive maintenance alerts and expert ASE-certified support, you can drive with peace of mind knowing help is always available.

Funding your vehicles.

Holman's leasing options allow businesses to optimize their fleet management by enhancing flexibility and funds. Open-ended leasing allows you to adjust payment structures with flexible terms and no mileage penalties, ensuring your fleet aligns with your business's evolving needs while maintaining financial stability. Purchase leasebacks convert owned vehicle assets into leases, freeing up capital for reinvestment without disrupting vehicle operations.

Managing your fleet.

Focus on running your business while Holman handles the management of your fleet vehicles. Your account includes a dedicated Account Executive and all fleet related charges on one consolidated bill, so you can rely on personalized service and proactive alerts for vehicle servicing and renewals.

Upfitting your vehicles.

We ensure your vehicles are fully equipped and ready for the job. As a single source for all your upfitting needs, Holman can streamline the process, delivering seamless solutions for your fleet.
